6ES7518-4JP00-0AB0

**Data sheet** 

SIMATIC S7-1500H, CPU 1518HF-4 PN, central processing unit with 9 MB work memory for program and 60 MB for data, 1st interface: PROFINET RT with 2-port switch, 2nd interface: PROFINET, 3rd interface: PROFINET, 4th/5th interface: H-SYNC, SIMATIC Memory Card required

| General information  |                               |
|--|-------------------------------|
| Product type designation   | CPU 1518HF-4PN                |
| HW functional status   | FS02                          |
| Firmware version   | V3.0                          |
| <ul> <li>FW update possible</li> </ul>                                     | Yes                           |
| Product function   |                               |
| ● I&M data   | Yes; I&M0 to I&M3             |
| <ul> <li>Isochronous mode</li> </ul>                                       | No                            |
| Engineering with   |                               |
| <ul> <li>STEP 7 TIA Portal configurable/integrated from version</li> </ul> | V18 (FW V3.0) / V17 (FW V2.9) |
| Display  |                               |
| Screen diagonal [cm]   | 6.1 cm                        |
| Control elements   |                               |
| Number of keys   | 6                             |
| Mode selector switch   | 1                             |
| Supply voltage   |                               |
| Rated value (DC)   | 24 V                          |
| permissible range, lower limit (DC)  | 19.2 V                        |
| permissible range, upper limit (DC)  | 28.8 V                        |
| Reverse polarity protection  | Yes                           |
| Mains buffering  |                               |
| Mains/voltage failure stored energy time                                   | 5 ms                          |
| Repeat rate, min.  | 1/s                           |
| Input current  |                               |
| Current consumption (rated value)  | 1.55 A                        |
| Current consumption, max.  | 1.95 A                        |
| Inrush current, max.   | 1.95 A; Rated value           |
| l²t  | 0.4 A <sup>2</sup> ·s         |
| Power loss   |                               |
| Power loss, typ.   | 24 W                          |
| Memory   |                               |
| Number of slots for SIMATIC memory card                                    | 1                             |
| SIMATIC memory card required   | Yes                           |
| Work memory  |                               |
| integrated (for program)   | 9 Mbyte                       |
| • integrated (for data)  | 60 Mbyte                      |
| Load memory  |                               |
| Plug-in (SIMATIC Memory Card), max.  | 32 Gbyte                      |
| Backup   |                               |
| maintenance-free   | Yes                           |

| CPU processing times                                      |   |
|---|---|
| for bit operations, typ.                                  | 4 ns  |
| for word operations, typ.                                 | 6 ns  |
|   |   |
| for fixed point arithmetic, typ.                          | 6 ns  |
| for floating point arithmetic, typ.                       | 24 ns   |
| CPU-blocks  Number of elements (total)                    | 20 000: Placks (OP EP EC DP) and LIDTs                                    |
| Number of elements (total)  DB                            | 20 000; Blocks (OB, FB, FC, DB) and UDTs                                  |
| Number range  | 1 60 999; subdivided into: number range that can be used by the user: 1   |
| • Number range  | 59 999, and number range of DBs created via SFC 86: 60 000 60 999         |
| Size, max.  | 16 Mbyte; For DBs with absolute addressing, the max. size is 64 KB        |
| FB  |   |
| Number range  | 0 65 535  |
| • Size, max.  | 1 Mbyte   |
| FC  |   |
| Number range  | 0 65 535  |
| • Size, max.  | 1 Mbyte   |
| OB  |   |
| • Size, max.  | 1 Mbyte   |
| Number of free cycle OBs                                  | 100   |
| Number of time alarm OBs                                  | 20  |
| Number of delay alarm OBs                                 | 20  |
| Number of cyclic interrupt OBs                            | 20; with minimum OB 3x cycle of 100 µs                                    |
| Number of process alarm OBs                               | 50  |
| Number of DPV1 alarm OBs                                  | 3   |
| Number of startup OBs                                     | 100   |
| Number of asynchronous error OBs                          | 4   |
| <ul> <li>Number of synchronous error OBs</li> </ul>       | 2   |
| Number of diagnostic alarm OBs                            | 1   |
| Nesting depth   |   |
| per priority class  | 24; Up to 8 possible for F-blocks   |
| Counters, timers and their retentivity                    |   |
| S7 counter  |   |
| Number  | 2 048   |
| Retentivity   |   |
| — adjustable  | Yes   |
| IEC counter   |   |
| Number  | Any (only limited by the main memory)                                     |
| Retentivity   |   |
| — adjustable  | Yes   |
| S7 times  |   |
| Number  | 2 048   |
| Retentivity   |   |
| — adjustable  | Yes   |
| IEC timer   |   |
| Number  | Any (only limited by the main memory)                                     |
| Retentivity   |   |
| — adjustable  | Yes   |
| Data areas and their retentivity                          |   |
| Retentive data area (incl. timers, counters, flags), max. | 768 kbyte; In total; available retentive memory for bit memories, timers, |
|   | counters, DBs, and technology data (axes): 700 KB                         |
| Flag  |   |
| • Size, max.  | 16 kbyte  |
| Number of clock memories                                  | 8; 8 clock memory bit, grouped into one clock memory byte                 |
| Data blocks   |   |
| Retentivity adjustable                                    | Yes   |
| Retentivity preset  | No  |
| Local data  |   |
| • per priority class, max.                                | 64 kbyte; max. 16 KB per block  |
| Address area  |   |
| Number of IO modules                                      | 8 192; max. number of modules / submodules                                |
|   |   |

| I/O address area   |   |
|--|---|
|  |   |
| • Inputs   | 32 kbyte; All inputs are in the process image   |
| Outputs  | 32 kbyte; All outputs are in the process image  |
| per integrated IO subsystem  |   |
| — Inputs (volume)  | 16 kbyte  |
| — Outputs (volume)   | 16 kbyte  |
| Subprocess images  |   |
| Number of subprocess images, max.  | 32  |
| Hardware configuration   |   |
| Number of distributed IO systems   | 1   |
| Number of IO Controllers   |   |
| • integrated   | 1   |
| Rack   |   |
| Modules per rack, max.   | 1; CPU  |
| Time of day  |   |
| Clock  |   |
| • Type   | Hardware clock  |
| Backup time  | 6 wk; At 40 °C ambient temperature, typically   |
| Deviation per day, max.  | 10 s; Typ.: 2 s   |
| Operating hours counter  |   |
| Number   | 16  |
| Clock synchronization  |   |
| • supported  | Yes   |
| on Ethernet via NTP  | Yes   |
| Interfaces   |   |
| Number of PROFINET interfaces  | 3   |
| Interface  |   |
|  |   |
| Interface types  | Voc. V1   |
| RJ 45 (Ethernet)      Number of parts  | Yes; X1   |
| Number of ports     integrated quiteb  | 2<br>Voa  |
| • integrated switch  | Yes   |
| Protocols  | Voca ID-4   |
| IP protocol  | Yes; IPv4   |
| PROFINET IO Controller   | Yes   |
| PROFINET IO Device   | No  |
| SIMATIC communication  | Yes; Only Server  |
| Open IE communication  | Yes   |
| Web server   | No  |
|  |   |
| Media redundancy   | Yes   |
|  |   |
| Media redundancy   |   |
| Media redundancy     PROFINET IO Controller  |   |
| Media redundancy     PROFINET IO Controller     Services   | Yes   |
| Media redundancy     PROFINET IO Controller     Services     — PG/OP communication   | Yes   |
| Media redundancy     PROFINET IO Controller     Services     — PG/OP communication     — Isochronous mode  | Yes<br>Yes<br>No  |
| Media redundancy     PROFINET IO Controller     Services     — PG/OP communication     — Isochronous mode     — IRT  | Yes Yes No No   |
| Media redundancy     PROFINET IO Controller     Services     — PG/OP communication     — Isochronous mode     — IRT     — PROFIenergy  | Yes  No No Yes; per user program 256  The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of   |
| Media redundancy     PROFINET IO Controller     Services     — PG/OP communication     — Isochronous mode     — IRT     — PROFlenergy     — Number of connectable IO Devices, max.   | Yes  Yes  No  No  Yes; per user program  256  The minimum value of the update time also depends on communication share  |
| Media redundancy     PROFINET IO Controller     Services     — PG/OP communication     — Isochronous mode     — IRT     — PROFIenergy     — Number of connectable IO Devices, max.     — Updating times  | Yes  No No Yes; per user program 256  The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of   |
| Media redundancy     PROFINET IO Controller     Services     — PG/OP communication     — Isochronous mode     — IRT     — PROFIenergy     — Number of connectable IO Devices, max.     — Updating times  Update time for RT  | Yes  No No Yes; per user program 256  The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data  |
| Media redundancy PROFINET IO Controller  Services  — PG/OP communication — Isochronous mode — IRT — PROFIenergy — Number of connectable IO Devices, max. — Updating times  Update time for RT — for send cycle of 1 ms  Interface  | Yes  No No Yes; per user program 256  The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data  |
| Media redundancy PROFINET IO Controller  Services  — PG/OP communication — Isochronous mode — IRT — PROFIenergy — Number of connectable IO Devices, max. — Updating times  Update time for RT — for send cycle of 1 ms  Interface Interface types  | Yes No No Yes; per user program 256 The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data  1 ms to 512 ms                            |
| Media redundancy PROFINET IO Controller  Services  — PG/OP communication — Isochronous mode — IRT — PROFIenergy — Number of connectable IO Devices, max. — Updating times  Update time for RT — for send cycle of 1 ms  Interface  Interface types  RJ 45 (Ethernet)   | Yes No No Yes; per user program 256 The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data  1 ms to 512 ms  Yes; X2                   |
| Media redundancy PROFINET IO Controller  Services  — PG/OP communication — Isochronous mode — IRT — PROFIenergy — Number of connectable IO Devices, max. — Updating times  Update time for RT — for send cycle of 1 ms  Interface  Interface types  RJ 45 (Ethernet)  Number of ports  | Yes No No Yes; per user program 256 The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data  1 ms to 512 ms  Yes; X2 1                 |
| ● Media redundancy PROFINET IO Controller  Services  — PG/OP communication — Isochronous mode — IRT — PROFIenergy — Number of connectable IO Devices, max. — Updating times  Update time for RT — for send cycle of 1 ms  2. Interface Interface types ● RJ 45 (Ethernet) ● Number of ports ● integrated switch                            | Yes No No Yes; per user program 256 The minimum value of the update time also depends on communication share set for PROFINET IO, on the number of IO devices, and on the quantity of configured user data  1 ms to 512 ms  Yes; X2                   |
