

Data Sheet

# Solenoid valve Type **EV220A**

Indirect servo operated for compact installation in various applications

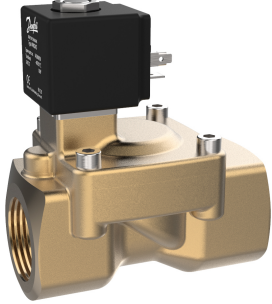

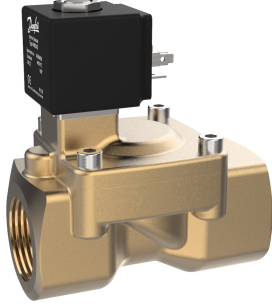

EV220A is a compact servo-operated 2/2-way solenoid valve program, especially designed for use in machines and equipment with limited space.

**Features**

- For water, oil, compressed air and similar neutral media
- Screw on coil
- Ambient temperatures: Up to 50 °C
- Enclosure: Up to IP65
- Low power consumption
- Liquid hammer damped

## 1 Portfolio overview

Table 1: Portfolio overview

Features	EV220A NC	EV220A NO
		
<b>Body material</b>	Brass	Brass
<b>DN [mm]</b>	6-50	6-22
<b>Connection</b>	G1/4" - G2"	G1/4" - G1"
<b>Sealing material</b>	EPDM, NBR, FKM	NBR
<b>K<sub>v</sub> [m<sup>3</sup>/h]</b>	1 - 32	1 - 7
<b>Differential pressure range [bar]</b>	0.2 - 16	0.2 - 16
<b>Temperature range [°C]</b>	-30 - 100	-10 - 90

## 2 Functions

### 2.1 Function, NC

#### Coil voltage disconnected

When voltage is disconnected, the armature spring (2) presses the armature (3) down against the pilot orifice (4). Pressure builds up over the diaphragm (5) via the equalizing orifice (7). The diaphragm closes the main orifice (6) as soon as the pressure over the diaphragm equals the inlet pressure. The valve stays closed for as long as voltage remains disconnected.

#### Coil voltage connected (open)

When voltage is applied to the coil (1), the pilot orifice (4) is opened. Since the pilot orifice is larger than the equalizing orifice (7), pressure over the diaphragm (5) falls and the diaphragm is lifted clear of the main orifice (6). The valve stays open for as long as the required least differential pressure is present and voltage is applied to the coil.

2.	Armature spring
3.	Armature
4.	Pilot orifice
5.	Diaphragm
6.	Main orifice
7.	Equalizing orifice

### 2.2 Function, NO

#### Coil voltage disconnected (Open)

When voltage is disconnected, the pilot orifice (4) is opened. Since the pilot orifice is larger than the equalizing orifice (6), pressure over the diaphragm (5) falls and the diaphragm is lifted clear of the main orifice (7). The valve stays open for as long as the required minimum differential pressure is present and voltage is applied to the coil.

#### Coil voltage connected (Close)

When voltage is applied to the coil (1), the armature spring (2) presses the armature (3) down against the pilot orifice (4). Pressure builds up over the diaphragm (5) via the equalizing orifice (6). The diaphragm closes the main orifice (7) as soon as the pressure over the diaphragm equals the inlet pressure. The valve stays closed for as long as voltage remains disconnected.

7.	Equalizing orifice

### 3 Applications

It is recommended to use a filter in front of the valve. Recommended filter 50 mesh (297 microns).

Figure 3: Filter

In water applications, exercise the valves at least once every 24 hours, meaning change the state of the valve. The valve exercise will minimize the risk of the valve sticking due to calcium carbonate, zinc or iron oxide build-up.

Figure 4: Exercise: Valve on/off

To minimize scaling, and corrosion attack it is recommended that the water passing the valve have the following values:

- Hardness 6-18 °dH to avoid scaling (chalk / lime stone build up).
- Conductivity 50 – 800  $\mu\text{S}/\text{cm}$  to avoid brass dezincification and corrosion.
- Above 25°C media temperature avoid stagnant water inside the valve to avoid dezincification and corrosion attack.

## 4 Product specification

### 4.1 Technical data

Table 2: Technical data

<b>Media</b>	NBR	For compressed air and oil
	FKM	For oil and air
	EPDM	For water
<b>Media temperature [°C]</b>	NBR	-10-90 °C
	FKM	0-100 °C (For water max 60 °C)
	EPDM	-30-100 °C
<b>Ambient temperature [°C]</b>	-40-50 °C	
<b>K<sub>v</sub> value [m<sup>3</sup>/h]</b>	DN6	1 m <sup>3</sup> /h
	DN10	1.6 m <sup>3</sup> /h
	DN12	2.5 m <sup>3</sup> /h
	DN14	4 m <sup>3</sup> /h
	DN18	7 m <sup>3</sup> /h
	DN22	7 m <sup>3</sup> /h
	DN32	15 m <sup>3</sup> /h
	DN40	18 m <sup>3</sup> /h
	DN50	32 m <sup>3</sup> /h
	<b>Min. Opening differential pressure [bar]</b>	DN6 - DN10
DN12 - 50		0.3 bar
<b>Max. Opening differential pressure [bar]</b>	DN6 - 50 EPDM/NBR	16 bar
	DN6 - 10 FKM DN12 - 50 FKM	16 bar 10 bar
<b>Max. working pressure [bar]</b>	Up to 16 bar (Equal to max. differential pressure)	
<b>Max. test pressure [bar]</b>	DN6 - 10	50 bar
	DN12 - 50	25 bar
<b>Viscosity [cSt]</b>	Max. 50 cSt	

### Capacity diagram

Example for water: Capacity for EV220A at differential pressure of 3 bar: Approx. 7 m<sup>3</sup>/h

Figure 5: Capacity diagram

## Time to open/close

Table 3: Time to open/close

Type	EV220A 6B	EV220A 10B	EV220A 12B	EV220A 14B	EV220A 18B	EV220A 22B	EV220A 32B	EV220A 40B	EV220A 50B
Time to open [ms] <sup>(1)</sup>	40	50	60	100	200	200	2500	4000	5000
Time to close [ms] <sup>(1)</sup>	250	300	300	400	500	500	4000	6000	10000

<sup>(1)</sup> Times are indicative and apply to water. Exact times will depend on pressure conditions.

## Materials

Table 4: Materials

Components	Materials	Specification
Valve body/cover	Brass	W. no. 2.0401
Armature/armature stop	Stainless steel	W. no. 1.4105 / AISI 430FR
Armature tube	Stainless steel	W. no. 1.4303 / AISI 305
Spring	Stainless steel	W. no. 14310 / AISI 301
O-ring	NBR/EPDM/FKM	
Valve plate	NBR/EPDM/FKM	
Diaphragm	NBR/EPDM/FKM

## 6 Online support

Danfoss offers a wide range of support along with our products, including digital product information, software, mobile apps, and expert guidance. See the possibilities below.

### The Danfoss Product Store

The Danfoss Product Store is your one-stop shop for everything product related—no matter where you are in the world or what area of the cooling industry you work in. Get quick access to essential information like product specs, code numbers, technical documentation, certifications, accessories, and more.

Start browsing at [store.danfoss.com](https://store.danfoss.com).

### Find technical documentation

Find the technical documentation you need to get your project up and running. Get direct access to our official collection of data sheets, certificates and declarations, manuals and guides, 3D models and drawings, case stories, brochures, and much more.

Start searching now at [www.danfoss.com/en/service-and-support/documentation](https://www.danfoss.com/en/service-and-support/documentation).

### Danfoss Learning

Danfoss Learning is a free online learning platform. It features courses and materials specifically designed to help engineers, installers, service technicians, and wholesalers better understand the products, applications, industry topics, and trends that will help you do your job better.

Create your Danfoss Learning account for free at [www.danfoss.com/en/service-and-support/learning](https://www.danfoss.com/en/service-and-support/learning).

### Get local information and support

Local Danfoss websites are the main sources for help and information about our company and products. Find product availability, get the latest regional news, or connect with a nearby expert—all in your own language.

Find your local Danfoss website here: [www.danfoss.com/en/choose-region](https://www.danfoss.com/en/choose-region).

### Spare Parts

Get access to the Danfoss spare parts and service kit catalog right from your smartphone. The app contains a wide range of components for air conditioning and refrigeration applications, such as valves, strainers, pressure switches, and sensors.

Download the Spare Parts app for free at [www.danfoss.com/en/service-and-support/downloads](https://www.danfoss.com/en/service-and-support/downloads).

Any information, including, but not limited to information on selection of product, its application or use, product design, weight, dimensions, capacity or any other technical data in product manuals, catalogues descriptions, advertisements, etc. and whether made available in writing, orally, electronically, online or via download, shall be considered informative, and is only binding if and to the extent, explicit reference is made in a quotation or order confirmation.
